Oil Field Environmental Incident Summary

Responsible Party: MUREX PETROLEUM CORPORATION **Well Operator:** MUREX PETROLEUM CORPORATION

Well Name: OSCAR OLSON 2-R

Field Name: SEVENMILE COULEE Well File #: 5654

Date Incident: 9/14/2016 Time Incident: 07:30 Facility ID Number:

County: RENVILLE Twp: 162 Rng: 86 Sec: 10 Qtr: NE SW

Location Description:

Submitted By: Williams Jansky Received By:

Contact Person: Shannon Holter

363 N. Sam Houston Pkwy. E.

Suite 200

HOUSTON, TX 77060

General Land Use: Cultivated Affected Medium: Topsoil

Distance Nearest Occupied Building:

Distance Nearest Water Well:

Type of Incident: Pipeline Leak

Release Contained in Dike: No Reported to NRC: No

Spilled Units Recovered Units Followup Units

Oil 3 Barrels

Brine Other

Description of Other Released Contaminant:

Inspected: Written Report Received: Clean Up Concluded:

Risk Evaluation:

None

Areal Extent:

50'x50' area approximately 200 ft north of well head.

Potential Environmental Impacts:

None

Action Taken or Planned:

The impacted area was found while plugging well. Area has been marked with flags. Clean up to begin after site meeting with landowner

Wastes Disposal Location: TBD

Agencies Involved:

Updates

Date: 9/16/2016 Status: Reviewed - Follow-up Required Author: O'Gorman, Brian

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Release, due to a pipeline leak, was not contained to the facility site according to the report. Further follow-up needed.

Date: 9/26/2016 Status: Inspection Author: O'Gorman, Brian

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 16:00. Could not find the release location initially but found a prairie trail entering Section 10 from the east side, in the middle half that takes you to the SE/SW portion of the section where a hole had been dug and the wellhead had been removed. Approximately 150' to the north of the excavation were some yellow flags marking the location of saturated soils. Closer inspection of the area showed an area approximately 45' X 28' where oil had daylighted in the cultivated field. More follow-up will be necessary to determine horizontal and vertical extent of the release. Further follow-up needed.
